

BUYING GUIDE

Choose your simulator.

1 / Type.

There are several types of simulators on the market. Among them, seat movers (2 actuators at the back of the seat), simulators with 2, 3, 4, 4, 5, 5, 6, 7... actuators / motors under or on the sides, etc.

A dynamic simulator provides breathtaking sensations and immersion, compared to a static simulator. It gives you information about the car's behaviour and the inclination of the road, allowing you to feel everything that is happening in your vehicle. With a dynamic simulator, your driving will be more precise, and a whole new dimension will be opened up to you.

At PROSIMU®, we have decided to offer you the best sensations with our different simulators, keeping in mind quality and price.

2 / Actuators.

Actuators are used to retranscribe the sensations and behaviour of a vehicle. The more actuators you have on your simulator, the closer you will get to reality.

With a T1000™ 2M, enter the world of dynamic simulation, it is the perfect tool to start and enjoy your games. It is suitable for all types of players.

With a T1000™ 3M, you add an additional axis of freedom and you can simulate the traction loss(oversteer) or mass transfer. If you like rallying or RWD cars, this simulator is for you. It is currently the best price/sensation compromise.

With a 5M T1000™, take advantage of the vertical mass transfer effect and feel the precise behaviour of your vehicle's 4 suspensions. Every bump, every jump, nothing escapes him. It is the ultimate simulator, rediscover all aspects of your game or simulation software. You want the best of simulation? The T1000™ 5M is waiting for you.

3 /Upgrade.

At PROSIMU®, it is possible to upgrade your simulator as your budget allows. All you have to do when you make your first purchase is to keep in mind what the final stage of your simulator would be.

Go from T1000™ 2M to T1000™ 3M

The graphic shows an upgrade path from a T1000™ 2M DYADIC simulator to a T1000™ 3M DYADIC simulator. A blue checkmark icon is positioned between the two simulator logos. The price for the 3M model is 1090€.

Package contents: T1000™ 3M dynamic platform + 1 Dyadic SCN6 actuator.

Go from T1000™ 3M to T1000™ 5M

The graphic shows an upgrade path from a T1000™ 3M DYADIC simulator to a T1000™ 5M PRS200™ simulator. A blue checkmark icon is positioned between the two simulator logos. The price for the 5M model is 7690€.

Package contents: T1000™ 5M dynamic platform + 4 PRS200™ actuators + control boxes & cables.

The graphic shows an upgrade path from a T1000™ 3M PRS200™ simulator to a T1000™ 5M PRS200™ simulator. A red 'BEST CHOICE' banner is at the top. A blue checkmark icon is positioned between the two simulator logos. The price for the 5M model is 4400€.

Package contents: T1000™ 5M dynamic platform + 2 PRS200™ actuators.
